**User Story sprint 1**

**Title**

As a resident of Lelystad, I want to be able to log in to the website of the municipality so that I can check the services provided to me.

**Description**

**What**

Residents of Lelystad want to login to the website of the municipality

**Why**

Residents of Lelystad need to identify themselves so that they can check the services that are provided t them or be able to request the services

**How**

- Implement the login form in the front-end
- Implement the API to support the login functionality
